Property, Plant and Equipment

Property, plant and equipment are stated at cost. Depreciation is computed by use of the straight-line method over the estimated useful lives of the assets, which for buildings is the lesser of 30 years or the remaining life of the underlying building; between one and five years for machinery and equipment, including product tooling and manufacturing process equipment; and the shorter of lease term or useful life for leasehold improvements. The Company capitalizes eligible costs to acquire or develop internal-use software that are incurred subsequent to the preliminary project stage. Capitalized costs related to internal-use software are amortized using the straight-line method over the estimated useful lives of the assets, which range from three to five years. Depreciation and amortization expense on property and equipment was \$8.2 billion, \$8.3 billion and \$9.2 billion during 2017, 2016 and 2015, respectively.

Amortization expense related to acquired intangible assets was \$1.2 billion, \$1.5 billion and \$1.3 billion in 2017, 2016 and 2015, respectively. A amortization expense related to acquired intangible assets as of September 30, 2017, is as follows (in millions):

2018

$$\text{COGS-DP} = 141048 - 9400 = 131648$$

$$\text{DP} = 8200 + 1200 = 9400$$
